

1. Fill in the blank: A _____ is malicious code written to interfere with computer operations and cause damage to data. 1 point
- ☐ business disruption
- ☒ computer virus
- ☐ spyware attack
- ☐ software breach
2. Which security event, related to the successful infiltration of a credit reporting agency, resulted in one of the largest known data breaches of sensitive information, including customers' social security and credit card numbers? 1 point
- ☐ Brain virus
- ☒ Equifax breach
- ☐ LoveLetter attack
- ☐ Morris worm
3. Fill in the blank: Social engineering is a manipulation technique that exploits _____ error to gain access to private information. 1 point

3. Fill in the blank: Social engineering is a manipulation technique that exploits _____ error to gain access to private information. 1 point
- ☐ coding
- ☐ computer
- ☒ human
- ☐ network
4. Which of the following threats are most likely to occur in the event of a phishing attack? Select all that apply. 1 point
- ☐ Theft of the organization's hardware
- ☒ Malicious software being deployed
- ☒ Employees inadvertently revealing sensitive data
- ☐ Overtaxing systems with too many internal emails
5. A security professional is researching compliance and the law in order to define security goals. Which domain does this scenario describe? 1 point
- ☒ Security and risk management
- ☐ Security assessment and testing

5. A security professional is researching compliance and the law in order to define security goals. Which domain does this scenario describe? 1 point
- ☒ Security and risk management
- ☐ Security assessment and testing
- ☐ Identity and access management
- ☐ Security architecture and engineering
6. Which of the following tasks may be part of the security architecture and engineering domain? Select all that apply. 1 point
- ☐ Analyzing user behavior
- ☒ Configuring a firewall
- ☒ Ensuring that effective systems and processes are in place
- ☒ Validating the identities of employees
7. Which of the following tasks may be part of the asset security domain? Select all that apply. 1 point
- ☒ Data storage and maintenance
- ☒ Securing digital and physical assets

7. Which of the following tasks may be part of the asset security domain? Select all that apply.

1 point

- ☒ Data storage and maintenance
- ☒ Securing digital and physical assets
- ☒ Proper disposal of digital assets
- ☐ Ensuring users follow established policies

8. A security professional is auditing user permissions at their organization to ensure that only the customer service, sales, and marketing teams have access to customer data. Which domain does this scenario describe?

1 point

- ☐ Security and risk management
- ☐ Security assessment and testing
- ☒ Asset security
- ☐ Communication and network security

9. A security professional must deactivate user accounts when employees leave the company to remove access to sensitive information and resources. Which domain does this scenario describe?

1 point

- ☐ Security assessment and testing
- ☒ Identity and access management

- ☒ Asset security
- ☐ Communication and network security

9. A security professional must deactivate user accounts when employees leave the company to remove access to sensitive information and resources. Which domain does this scenario describe?

1 point

- ☐ Security assessment and testing
- ☒ Identity and access management
- ☐ Security and risk management
- ☐ Communication and network security

10. Which of the following tasks may be part of the security operations domain? Select all that apply.

1 point

- ☒ Implementing preventive measures
- ☒ Investigating an unknown device that has connected to an internal network
- ☐ Using secure coding practices to create safe applications and services
- ☒ Conducting investigations
