1. Fill in the blank: Network protocols are rules used by two or more devices on a network to describe the _____ and structure of data.

1 / 1 point

- ☐ optimum speed
- ☐ maximum size
- ☐ access level
- ☒ order of delivery

Correct

Network protocols are rules used by two or more devices on a network to describe the order of delivery and the structure of data.

2. Which network protocol provides a secure method of communication between clients and web servers?

1 / 1 point

- ☐ DNS
- ☐ ARP
- ☐ TCP

- ☒ HTTPS

Correct

Hypertext transfer protocol secure (HTTPS) provides a secure method of communication between clients and web servers. HTTPS uses digital certificates to perform authentication and can operate over TCP ports 443 and 80.

3. To keep information safe from malicious actors, what security protocol can be used?

1 / 1 point

- ☒ Secure sockets layer and transport layer security (SSL/TLS)
- ☐ Transmission control protocol (TCP)
- ☐ Domain name system (DNS)
- ☐ Address resolution protocol (ARP)

Correct

To keep information safe from malicious actors, SSL/TLS can be used. It secures hypertext transfer protocol (HTTP) transactions, which is known as hypertext transfer protocol secure (HTTPS).

4. IEEE 802.11, also known as Wi-Fi, is a set of standards that define communication for wireless LANs.

1 / 1 point

- ☒ True

3. To keep information safe from malicious actors, what security protocol can be used?

1 / 1 point

- ☒ Secure sockets layer and transport layer security (SSL/TLS)
- ☐ Transmission control protocol (TCP)
- ☐ Domain name system (DNS)
- ☐ Address resolution protocol (ARP)

Correct

To keep information safe from malicious actors, SSL/TLS can be used. It secures hypertext transfer protocol (HTTP) transactions, which is known as hypertext transfer protocol secure (HTTPS).

4. IEEE 802.11, also known as Wi-Fi, is a set of standards that define communication for wireless LANs.

1 / 1 point

- ☒ True
- ☐ False

Correct

IEEE 802.11, also known as Wi-Fi, is a set of standards that define communication for wireless LANs.
