1. Do detection tools have limitations in their detection capabilities?

1 / 1 point

- ☒ Yes
- ☐ No

 **Correct**

Detection tools have limitations in their detection capabilities. Detection tools are an important part of incident detection and response, but they cannot detect everything. Additional methods of detection can be used to improve coverage and accuracy.

2. Why do security analysts refine alert rules? Select two answers.

1 / 1 point

- ☒ To improve the accuracy of detection technologies

 **Correct**

Security analysts refine alert rules to improve the accuracy of detection technologies and reduce false positive alerts. Rules are adjusted to match the activity intended to be detected.

- ☐ To increase alert volumes

- ☐ To create threat intelligence
- ☒ To reduce false positive alerts

 **Correct**

Security analysts refine alert rules to improve the accuracy of detection technologies and reduce false positive alerts. Rules are adjusted to match the activity intended to be detected.

3. Fill in the blank: ____ involves the investigation and validation of alerts.

1 / 1 point

- ☐ Threat hunting
- ☒ Analysis
- ☐ Honeypot
- ☐ Detection

 **Correct**

Analysis involves the investigation and validation of alerts.

4. What are some causes of high alert volumes? Select two answers.

1 / 1 point

- ☐ Refined detection rules

- ☐ Honeypot
- ☐ Detection

 **Correct**

Analysis involves the investigation and validation of alerts.

4. What are some causes of high alert volumes? Select two answers.

1 / 1 point

- ☐ Refined detection rules
- ☐ Sophisticated evasion techniques
- ☒ Broad detection rules

 **Correct**

Misconfigured alert settings and broad detection rules are some causes of high alert volumes.

- ☒ Misconfigured alert settings

 **Correct**

Misconfigured alert settings and broad detection rules are some causes of high alert volumes.
