1. Which step of the NIST Incident Response Lifecycle involves the investigation and validation of alerts?

1 / 1 point

- ☐ Discovery
- ☒ Analysis
- ☐ Detection
- ☐ Recovery

✔ Correct

2. An organization is completing its annual compliance audit. The people performing the audit have access to any relevant information, including records and documents. Which documentation benefit does this scenario outline?

1 / 1 point

- ☐ Consistency
- ☒ Transparency
- ☐ Accuracy
- ☐ Organization

✔ Correct

3. What are examples of how transparent documentation can be useful? Select all that apply.

0.5 / 1 point

- ☒ Providing evidence for legal proceedings
- ☒ Meeting cybersecurity insurance requirements
- ☒ Demonstrating compliance with regulatory requirements
- ☒ Defining an organization's security posture

✔ Correct

✔ Correct

✘ This should not be selected

Please review [the video on documentation](#).

4. A member of the forensics department of an organization receives a computer that requires examination. On which part of the chain of custody form should they sign their name and write the date?

1 / 1 point

- ☐ Evidence movement
- ☒ Custody log
- ☐ Purpose of transfer
- ☐ Description of the evidence

✔ Correct

5. An analyst is responding to a distributed denial of service attack (DDoS). They take several manual steps outlined in the organization's DDoS playbook. Which type of playbook did they use to respond to the incident?

1 / 1 point

- ☒ Non-automated
- ☐ Semi-automated
- ☐ Automated
- ☐ SOAR

✔ Correct

6. A security analyst gets an alert involving a phishing attempt. Which step of the triage process does this

1 / 1 point

scenario outline?

- ☐ Assign priority
- ☒ Receive and assess
- ☐ Add context
- ☐ Collect and analyze

 Correct

7. After a security incident involving an exploited vulnerability due to outdated software, a security analyst applies patch updates. Which of the following steps does this task relate to?

1 point

- ☐ Response
- ☒ Prevention
- ☐ Reimaging
- ☐ Eradication

 IncorrectPlease review [the video on containment, eradication, and recovery](#).

8. Which step of the NIST Incident Response Lifecycle involves returning affected systems back to normal operations?

1 / 1 point

- ☐ Containment
- ☒ Recovery
- ☐ Response
- ☐ Eradication

 Correct

9. What questions can be asked during a lessons learned meeting? Select three answers.

0.8 / 1 point

- ☐ What time did the incident happen?
- ☒ What could have been done differently?
- ☐ Which employee is to blame?
- ☒ What were the actions taken for recovery?

 Correct Correct

- ☐ Which employee is to blame?
- ☒ What were the actions taken for recovery?

 Correct You didn't select all the correct answers

10. During a lessons learned meeting following an incident, a meeting participant wants to identify actions that the organization can take to prevent similar incidents from occurring in the future. Which section of the final report should they refer to for this information?

1 / 1 point

- ☐ Executive summary
- ☐ Timeline
- ☒ Recommendations
- ☐ Detection

 Correct
