1. Which of the following statements correctly describe logs? Select two answers.

1 / 1 point

- ☐ A log is used as a formal guide to incident response.
- ☒ Logs helps identify vulnerabilities and potential security breaches.
- ☒ A business might log each time an employee accesses web-based services.
- ☐ Security professionals use logs to automate tasks.

 Correct Correct

2. Which of the following tasks can be performed using SIEM tools? Select three answers.

1 / 1 point

- ☐ Requesting security data from government agencies
- ☒ Helping security analysts identify potential breaches

 Correct

3. Which of the following tasks can be performed using SIEM tools? Select three answers.

- ☒ Collecting and analyzing data
- ☒ Providing alerts for specific types of risks and threats

 Correct Correct Correct

3. A cybersecurity analyst needs to collect data from multiple places to analyze filtered events and patterns. What type of tool should they use?

1 / 1 point

- ☐ Linux operating system
- ☒ Security information and event management (SIEM)
- ☐ Playbook
- ☐ network protocol analyzer (packet sniffer)

 Correct

4. Fill in the blank: A security professional uses a _____ as a manual to guide operational activities.

1 / 1 point

- ☐ spreadsheet
- ☐ review
- ☐ toolkit
- ☒ playbook

 Correct

5. As a security analyst, you are tasked with auditing your organization's network to identify security related issues. How might a network protocol analyzer (packet sniffer) help you perform this task?

1 / 1 point

- ☐ By removing malware and viruses from the network
- ☐ By simulating attacks on connected devices
- ☐ By automating tasks that reduce human error
- ☒ By capturing and analyzing data traffic on the network

 Correct

6. What are some key benefits of programming languages? Select all that apply.

1 / 1 point

☒ Execute repetitive processes very accurately

 Correct

☒ Complete repetitive tasks with a high degree of efficiency

 Correct

☒ Can be used to create a specific set of instructions for a computer to execute tasks

 Correct

☐ To provide details about any operational action

7. Fill in the blank: Linux relies on a(n) _____ as the primary user interface.

1 / 1 point

☐ ciphertext

☐ error log

☐ dashboard

☒ command line

 Correct

8. Fill in the blank: A database is a _____ of organized data stored in a computer system.

1 / 1 point

☐ model

☒ collection

☐ frame

☐ visualization

 Correct

9. What are some key benefits of using Python to perform security tasks? Select all that apply.

1 / 1 point

☒ It is designed for high levels of accuracy.

 Correct

☒ It simplifies repetitive tasks.

 Correct

☐ It makes static data more dynamic.

☒ It helps security professionals be more accurate.

 Correct
