2. A security team is considering what they learned during past security incidents. They also discuss ways to improve their security posture and refine response strategies for future incidents. What is the security team's goal in this scenario?

1 / 1 point

goal in this scenario?

☒ Update a playbook☐ Educate clients☐ Assess employee performance☐ Delete biometric data

Correct

3. Fill in the blank: Incident response playbooks outline processes for communication and \_\_\_\_\_ of a security breach.

1 / 1 point

☒ documentation☐ iteration☐ concealment☐ implementation

Correct

4. An organization has successfully responded to a security incident. According to their established standards,

1 / 1 point

the organization must share information about the incident to a specific government agency. What phase of an incident response playbook does this scenario describe?

☒ Coordination☐ Detection and analysis☐ Preparation☐ Containment

Correct

5. What are the primary goals of the containment phase of an incident response playbook? Select two answers.

1 / 1 point

☐ Assess the damage☒ Prevent further damage

Correct

☒ Reduce the immediate impact

Correct

☐ Analyze the magnitude of the breach

6. Fill in the blank: During the post-incident activity phase, organizations aim to enhance their overall \_\_\_\_\_ by determining the incident's root cause and implementing security improvements.

1 / 1 point

- ☒ security posture
- ☐ employee engagement
- ☐ security audit
- ☐ user experience

 Correct

7. A security analyst documents procedures to be followed in the event of a security breach. They also establish staffing plans and educate employees. What phase of an incident response playbook does this scenario describe?

1 / 1 point

- ☐ Coordination
- ☐ Eradication and recovery
- ☒ Preparation
- ☐ Detection and analysis

 Correct

- ☐ Eradication and recovery
- ☒ Preparation
- ☐ Detection and analysis

 Correct

8. In what ways do SIEM tools and playbooks help security teams respond to an incident? Select all that apply.

1 / 1 point

- ☐ Playbooks analyze data to detect threats.
- ☒ SIEM tools generate alerts.

 Correct

- ☒ SIEM tools collect data.

 Correct

- ☒ After receiving a SIEM alert, security teams use playbooks to guide their response process.

 Correct
