1. The first phase of the NIST Incident Response Lifecycle is Preparation. What are the other phases? Select three answers.

1 / 1 point

☒ Detection and Analysis☒ Correct

The three other phases of the NIST Incident Response Lifecycle are: Detection and Analysis; Containment, Eradication, and Recovery; and Post-Incident Activity.

☐ Identify☒ Post-Incident Activity☒ Correct

The three other phases of the NIST Incident Response Lifecycle are: Detection and Analysis; Containment, Eradication, and Recovery; and Post-Incident Activity.

☒ Containment, Eradication, and Recovery☒ Correct

The three other phases of the NIST Incident Response Lifecycle are: Detection and Analysis; Containment, Eradication, and Recovery; and Post-Incident Activity.

2. What type of process is the NIST Incident Response Lifecycle?

1 / 1 point

☐ Synchronous☐ Observable☒ Cyclical☐ Linear☒ Correct

The NIST Incident Response Lifecycle is a cyclical process. This means that phases in the lifecycle can be revisited or repeated as incident investigations progress.

3. Fill in the blank: An _____ is an observable occurrence on a network, system, or device.

1 / 1 point

☐ incident☒ event☐ analysis☐ investigation☒ Correct

An event is an observable occurrence on a network, system, or device.

4. A security professional investigates an incident. Their goal is to gain information about the 5 W's, which include *what* happened and *why*. What are the other W's? Select three answers.

1 / 1 point

☐ Which type of incident it was☒ Where the incident took place☒ CorrectThe other W's are: *who* triggered the incident, *when* the incident took place, and *where* the incident took place.☒ When the incident took place☒ CorrectThe other W's are: *who* triggered the incident, *when* the incident took place, and *where* the incident took place.☒ Who triggered the incident☒ CorrectThe other W's are: *who* triggered the incident, *when* the incident took place, and *where* the incident took place.
