1. Which tool collects and analyzes log data to monitor critical activities in an organization?

1 / 1 point

- ☒ Security information and event management (SIEM) tool
- ☐ Intrusion prevention system (IPS) tool
- ☐ Intrusion detection system (IDS) tool
- ☐ Playbook

Correct

SIEM tools collect and analyze log data to monitor critical activities in an organization.

2. Fill in the blank: Security orchestration, automation, and response (SOAR) is a collection of applications, tools, and workflows that uses automation to ____ security events.

1 / 1 point

- ☒ respond to
- ☐ interact with
- ☐ collect
- ☐ remediate

Correct

SOAR is a collection of applications, tools, and workflows that uses automation to respond to security events.

3. Which step in the SIEM process transforms raw data to create consistent log records?

1 / 1 point

- ☒ Normalize data
- ☐ Collect and aggregate data
- ☐ Analyze data
- ☐ Centralize data

Correct

During the normalize data step in the SIEM process, raw data is transformed to create consistent log records. The normalization process involves cleaning the data and removing non-essential attributes.

4. What is the process of gathering data from different sources and putting it in one centralized place?

1 / 1 point

- ☒ Aggregation
- ☐ Notification
- ☐ Analysis

- ☐ Collect and aggregate data
- ☐ Analyze data
- ☐ Centralize data

Correct

During the normalize data step in the SIEM process, raw data is transformed to create consistent log records. The normalization process involves cleaning the data and removing non-essential attributes.

4. What is the process of gathering data from different sources and putting it in one centralized place?

1 / 1 point

- ☒ Aggregation
- ☐ Notification
- ☐ Analysis
- ☐ Normalization

Correct

Aggregation is the process of gathering data from different sources and putting it in one centralized place.
