3. Fill in the blank: The stages of a social engineering attack include to prepare, establish trust, use persuasion tactics, and _____.

1 / 1 point

- ☒ disconnect from the target
- ☐ evaluate defenses
- ☐ spread awareness with others
- ☐ stay informed of security trends

**Correct**

The stages of a social engineering attack include to prepare, establish trust, use persuasion tactics, and disconnect from the target. Attackers typically break communications with their target after collecting the information they want. They do this to cover their tracks if they decide to target others in an organization.

4. Phishing kits typically contain which of the following tools to help attackers avoid detection? Select three answers.

1 / 1 point

- ☒ Fraudulent web links

**Correct**

Phishing kits typically contain tools such as malicious attachments, fake data-collection forms, and fraudulent web links in order to help attackers avoid detection.

- ☐ Email filters

- ☒ Fake data-collection forms

**Correct**

Phishing kits typically contain tools such as malicious attachments, fake data-collection forms, and fraudulent web links in order to help attackers avoid detection.

- ☒ Malicious attachments

**Correct**

Phishing kits typically contain tools such as malicious attachments, fake data-collection forms, and fraudulent web links in order to help attackers avoid detection.
