1. A security analyst queries a database related to security patches. How can SQL help this analyst with their work?

1 / 1 point

- ☐ SQL will send out a spreadsheet about the patches.
- ☒ The analyst can efficiently find the data they need.
- ☐ SQL will automatically produce a report when the patches have been installed.
- ☐ The analyst can directly install patches from SQL.

✓ Correct

2. What is true about the values in the primary key column? Select all that apply.

1 / 1 point

- ☒ Each row must have a unique value.

✓ Correct

- ☐ They should never contain numeric data.
- ☐ They do not need to be unique.

- ☒ They cannot be null (or empty).

✓ Correct

3. Which of these SQL statements queries the **employees** table? Select all that apply.

1 / 1 point

- ☐ `SELECT employees`
`FROM employee_id;`
- ☐ `SELECT employees`
`FROM *;`
- ☒ `SELECT *`
`FROM employees;`

✓ Correct

- ☒ `SELECT employee_id, device_id`
`FROM employees`
`WHERE employee_id > 1100;`

✓ Correct

4. Both an **employees** table and a **machines** table contain an **employee_id** column, and you want to return only the records that share a value in this column. Which keyword should be part of your query?

1 / 1 point

- ☐ BETWEEN
- ☒ INNER JOIN
- ☐ FULL OUTER JOIN
- ☐ WHERE

✓ Correct

5. What does `WHERE department = 'Sales'` indicate in the following SQL query?

1 / 1 point

- ```
SELECT *
FROM employees
WHERE department = 'Sales';
```
- ☐ To only return the **department** column
- ☐ To change all the values in the **department** column to **'Sales'**
- ☒ To only return rows that match the filter
- ☐ To highlight the **department** column in the results

Correct

6. Which query returns all records that contain the character 'z' from the **name** column in the **employees** table?

1 / 1 point

- ☐ `SELECT name`  
`FROM employees`  
`WHERE name LIKE 'z';`
- ☐ `SELECT name`  
`FROM employees`  
`WHERE name LIKE 'z';`
- ☒ `SELECT name`  
`FROM employees`  
`WHERE name LIKE '%z%';`
- ☐ `SELECT name`  
`FROM employees`  
`WHERE name = 'z%';`

Correct

7. You need to perform a SQL join. You want to return all the columns with records matching on the **employee\_id** column between the **employees** and **machines** tables. You also want to return all records from the **machines** table. Which of the following queries would you use?

1 / 1 point

- ☒ `SELECT *`  
`FROM employees`  
`RIGHT JOIN machines ON employees.employee_id = machines.employee_id;`
- ☐ `SELECT *`  
`FROM employees`  
`LEFT JOIN machines ON employees.employee_id = machines.employee_id;`
- ☐ `SELECT *`  
`FROM employees`  
`FULL OUTER JOIN machines ON employees.employee_id = machines.employee_id;`
- ☐ `SELECT *`  
`FROM employees`

`INNER JOIN machines ON employees.employee_id = machines.employee_id;`

Correct

8. You are working with the **Chinook** database. You want to return the **lastname** and **title** columns from the **employees** table. Replace `--???` with the missing information to complete the query. (If you want to undo your changes to the query, you can click the Reset button.)

1 / 1 point

```
1 select lastname,title
2 FROM employees;
```

Run

Reset

What is the title of the employee with the last name of Callahan?

- ☒ IT Staff
- ☐ IT Manager
- ☐ Sales Manager
- ☐ General Manager

Correct

9. You are working with the **Chinook** database and are responsible for filtering for invoices with a **total** that is more than **20**. Replace **--???** with the missing information to complete the query. (If you want to undo your changes to the query, you can click the Reset button.)

1 / 1 point

```
1 SELECT customerid, total
2 FROM invoices
3 where total>20;
4
```

Run

Reset

How many invoices have a total that is more than 20?

- ☒ 4
- ☐ 1
- ☐ 3
- ☐ 2

✓ Correct

10. You are working with the **Chinook** database and are responsible for filtering for the customers that live in the **city** of '**Mountain View**' and work for the **company** of '**Google Inc.**'. Replace **--???** with the missing information to complete the query. (If you want to undo your changes to the query, you can click the Reset button.)

1 / 1 point

10. You are working with the **Chinook** database and are responsible for filtering for the customers that live in the **city** of '**Mountain View**' and work for the **company** of '**Google Inc.**'. Replace **--???** with the missing information to complete the query. (If you want to undo your changes to the query, you can click the Reset button.)

1 / 1 point

```
1 SELECT firstname, lastname, city, company
2 FROM customers
3 where city = 'Mountain View' and company = 'Google Inc.';
```

Run

Reset

How many customers live in Mountain View and work for Google Inc.?

- ☒ 1
- ☐ 3
- ☐ 2
- ☐ 4

✓ Correct
