1. Which functions would fall under the category of operational security controls? Select two answers.

1 / 1 point

☒ Responding to an incident alert Correct☐ Exchanging encrypted information☐ Establishing trust using digital certificates☒ Providing security awareness training Correct

2. A large hotel chain collects customer email addresses as part of a national sweepstakes. As data custodians, what are the hotel chain's responsibilities to protect this information? Select three answers.

1 / 1 point

☒ To protect the data while in storage Correct☐ To edit the data when necessary☒ To safely handle the data when it's accessed Correct☒ To securely transport the data over networks Correct

3. You send an email to a friend. The service provider of your inbox encrypts all messages that you send. What happens to the information in your email when it's encrypted?

1 / 1 point

☐ It's converted from a hash value to ciphertext.☐ It's converted from ciphertext to plaintext.☒ It's converted from plaintext to ciphertext.☐ It's converted from Caesar's cipher to plaintext. Correct

4. How is hashing primarily used by security professionals?

1 / 1 point

☐ To store data in the cloud☐ To decrypt sensitive data☐ To make data quickly available☒ To determine data integrity Correct

5. Fill in the blank: A _____ is used to prove the identity of users, companies, and networks in public key infrastructure.

1 / 1 point

☐ digital signature☐ access key☐ access token☒ digital certificate Correct

6. What are the two most common forms of identification used by authentication systems? Select two answers.

1 / 1 point

☐ Fingerprint☒ Username Correct☒ Password Correct☐ Facial scan

7. What is a key advantage of multi-factor authentication compared to single sign-on?

1 / 1 point

- ☒ It requires more than one form of identification before granting access to a system.
- ☐ It is faster when authenticating users.
- ☐ It can grant access to multiple company resources at once.
- ☐ It streamlines the authentication process.

 Correct

8. A business has one person who receives money from customers at the register. At the end of the day, another person counts that money that was received against the items sold and deposits it. Which security principles are being implemented into business operations? Select two answers.

1 / 1 point

☒ Least privilege Correct☐ Single sign-on☒ Separation of duties Correct☐ Multi-factor authentication

9. Fill in the blank: ____ is the technology used to establish a user's request to access a server.

1 / 1 point

- ☒ Basic auth
- ☐ OAuth
- ☐ Digital certificates
- ☐ API tokens

 Correct☒ Basic auth☐ OAuth☐ Digital certificates☐ API tokens Correct

10. A customer of an online retailer has complained that their account contains an unauthorized purchase. You investigate the incident by reviewing the retailer's access logs. Which component of the user's session that you might review?

1 / 1 point

- ☐ Session algorithm
- ☐ Session API key
- ☒ Session cookie
- ☐ Session certificate

 Correct
