

Your grade: 100%

Your latest: 100% • Your highest: 100% • To pass you need at least 75%. We keep your highest score.

[Next item →](#)1. Which of these is *not* included in the Python Standard Library?

1 / 1 point

- ☐ `re`
- ☒ `NumPy`
- ☐ `time`
- ☐ `csv`

 Correct

The **NumPy** library is not included in the Python Standard Library. It is an external library that must be downloaded.

2. Which of the following resources provides recommendations about including comments in your code?

1 / 1 point

- ☐ `csv`
- ☐ Python Standard Library
- ☒ PEP 8
- ☐ `re`

 Correct

The PEP 8 style guide is a resource that provides stylistic guidelines for programmers working in Python, including recommendations about comments. This includes guidelines such as making comments clear and keeping them up-to-date when code changes.

3. Which of the following code blocks have correct indentation?

1 / 1 point

- ☐

```
if username == "elarson":  
    print("Welcome, elarson!")
```
- ☒

```
if username == "elarson":  
    print("Welcome, elarson!")
```
- ☐

```
if username == "elarson":  
print("Welcome, elarson!")
```
- ☐

```
if username == "elarson":  
    print("Welcome, elarson!")
```

 Correct

The following block of code demonstrates correct indentation:

 Correct

The following block of code demonstrates correct indentation:

```
if username == "elarson":  
    print("Welcome, elarson!")
```

The body of a conditional statement, which is the `print()` function in this case, must be indented for the code to execute properly.

4. What is a Python module?

1 / 1 point

- ☐ A text file that contains cybersecurity-related data
- ☐ A resource that provides stylistic guidelines for programmers working in Python
- ☐ A Python function that exists within Python and can be called directly
- ☒ A Python file that contains additional functions, variables, and any kind of runnable code

 Correct

A Python module is a Python file that contains additional functions, variables, and any kind of runnable code.
