1. Fill in the blank: To define a function, you should place the keyword _____ before the function name.

1 / 1 point

- ☐ return
- ☐ in
- ☐ type
- ☒ def

✓ Correct

2. Which of the following components are needed to call a built-in function in Python? Select three answers.

1 / 1 point

☒ ()

✓ Correct

☒ The function name

✓ Correct

☒ The arguments required by the function

✓ Correct

☐ :

3. What is a parameter?

1 / 1 point

- ☐ The name of a function that is being defined
- ☐ A variable returned from a function
- ☐ The data brought into a function when it is called
- ☒ An object that is included in a function definition for use in that function

✓ Correct

4. Fill in the blank: The `re`, `csv`, `glob`, and `time` modules are all _____.

1 / 1 point

- ☐ built-in functions
- ☐ part of PEP 8
- ☐ keywords in a function header

☒ part of the Python Standard Library

✓ Correct

5. What does this line of code return?

1 / 1 point

```
print(sorted(["h32rb17", "p52jb81", "k11ry83"]))
```

- ☐ ["p52jb81", "k11ry83", "h32rb17"]
- ☐ ["h32rb17"]
- ☐ ["p52jb81"]
- ☒ ["h32rb17", "k11ry83", "p52jb81"]

✓ Correct

6. What is returned from the following user-defined function if you pass it the arguments `2` and `3`?

1 / 1 point

```
def add(num1, num2):  
    result = num1 + num2  
    return result  
  
add(2, 3)
```

- ☐ 1
- ☒ 5
- ☐ 3
- ☐ 2

✓ Correct

7. What can a style guide help you with when working with Python? Select two answers.

1 / 1 point

☒ Making your code more consistent

✓ Correct

☐ Finding new modules you can incorporate into your code

☐ Finding ways to make your code more complex

☒ Making it easier for other programmers to understand your code

✓ Correct

8. Why are comments useful? Select three answers.

1 / 1 point

☒ They explain the code to other programmers.

✓ Correct

☐ They make the code run faster.

☒ They provide insight on what the code does.

✓ Correct

☒ They make debugging easier later on.

✓ Correct

9. What are built-in functions?

1 / 1 point

☐ Functions that return information

☒ Functions that exist with Python and can be called directly

☐ Functions that take parameters

☐ Functions that a programmer builds for their specific needs

✓ Correct

9. What are built-in functions?

1 / 1 point

☐ Functions that return information

☒ Functions that exist with Python and can be called directly

☐ Functions that take parameters

☐ Functions that a programmer builds for their specific needs

✓ Correct

10. Fill in the blank: Python modules are files that _____.

1 / 1 point

☒ contain any kind of runnable code

☐ only contain built-in functions

☐ contain libraries

☐ only contain new variables

✓ Correct
