

Exemplar: Practice writing Python code

 [Launch lab](#)

^ Instructions

This lab exemplar provides a completed model of the lab activity that precedes it. You can compare the code and text responses in this exemplar to your own work in the activity.

To begin reviewing the exemplar, click **Open Lab**. The notebook that contains the lab exemplar will open in a new browser tab.

When you have finished your review, close the browser tab that contains the lab exemplar. Sometimes you need to refresh your Coursera page in order for your progress to be registered. If you refresh this page after you complete your lab, the green check mark should appear.

Best practices for completing labs:

- Make sure your browser is up to date with the latest version.
- Make sure your internet connection is stable.
- After you complete the lab, leave the lab window open for at least 10 minutes in order to allow the system to record your progress.
- If you run into issues connecting to the lab, try logging into Coursera in an Incognito mode and completing the lab there.
- Review [Lab tips and troubleshooting steps](#)  for more information.
