1. Which of the following statements accurately describe operating systems? Select all that apply.

1 / 1 point

☐ Operating systems are part of the physical components of a computer.☒ Operating systems help people and computers communicate. Correct☒ Operating systems enable computers to run multiple applications at once. Correct☐ Operating systems are not necessary for smartphones to function.

2. Which of the following operating systems were designed to run on desktop and laptop computers? Select two answers.

1 / 1 point

☐ Android☒ Windows Correct Correct☐ iOS☒ macOS® Correct

3. What does BIOS load in order to start an operating system?

1 / 1 point

☐ UEFI☒ The bootloader☐ The user interface☐ An anti-virus application Correct

4. Fill in the blank: When someone uses a computer application, the \_\_\_\_\_ interprets the user's requests and directs them to the appropriate components of the computer's hardware.

1 / 1 point

☐ bootloader☐ BIOS☐ CPU☒ operating system Correct

5. If you wanted to perform a calculation on your computer, which of these things would happen? Select three answers.

1 / 1 point

☒ You would type in the number you wanted to calculate into the application. Correct☒ The application would send this request to the operating system. Correct☐ The hardware would send the answer directly back to the application.☒ The hardware would determine the answer and send it back to the operating system. Correct

6. Fill in the blank: The user communicates with the operating system via a(n) \_\_\_\_.

1 / 1 point

- ☐ another operating system
- ☐ specialized type of hardware
- ☒ user interface
- ☐ user application

✔ Correct

7. Which of the following statements correctly describe GUIs and CLIs? Select three answers.

1 / 1 point

☒ CLI commands execute tasks, such as moving a file to a new folder.

✔ Correct

☒ GUI icons help users manage different tasks on a computer.

✔ Correct

☐ A CLI performs multiple tasks less efficiently than a GUI.

☒ A CLI is a text-based user interface.

✔ Correct

8. A security team is alerted to a possible breach in their system. One analyst follows the instructions from their playbook, which include entering commands in the command line. Next, another analyst provides support by checking the commands to confirm that they were entered correctly. What does this scenario describe?

1 / 1 point

- ☐ Repeating a process using the start menu
- ☐ Reviewing a history file in a GUI
- ☐ Tracing the usage of files and applications with icons
- ☒ Reviewing a history file in a CLI

✔ Correct

9. To ensure a computer's capacity is used where it is needed most, what does an operating system manage?

1 / 1 point

- ☐ Icons and graphics
- ☒ Resources and memory
- ☐ Viruses and malware
- ☐ BIOS and UEFI

✔ Correct
