

Reference guide: Python concepts from Course 7

This reference guide contains Python language introduced during the Automate Cybersecurity with Python course. The guide is organized into the following sections:

- Comments
- Conditional statements
- Iterative statements
- User-defined functions
- Built-in-functions
- Importing modules and libraries
- String methods
- List methods
- Additional syntax for working with strings and lists
- Regular expressions
- File operations
- Parsing

Within each section, items generally appear in the order they were introduced.
